QUESTION 1
You are working with two components: Component A and Component B. Component B has a slightly different behavior than component A. What is the best way to reuse the default script of component A in component B?

A.   Set a property in component B called sling:resourceSuperType with the path to component A and omit the default script in component B
B.   Set a property in component B called sling:resourceSuperType with the path to component A and create an empty default script in component B
C.   Set a property in component B called sling:resourceSuperType with the path to component A and include the default script of component A in the default script in component B
D.   Copy the default script from component A into component B

Answer: A

QUESTION 2
What does an Item represent in a JCR repository hierarchical content model diagram?

A.   The value to be stored
B.   A Node or a Property
C.   The UUID of Node
D.   The path to a Node

Answer: B

QUESTION 3
Which access control policies does the JCR Session define to manage nodes?

A.   Privileges to access the JCR workspace.
B.   Permissions to access the JCR repository.
C.   Capabilities to traverse the JCR repository.
D.   A list of node locks in the JCR workspace.

Answer: A

QUESTION 4
How do you delete a property inside a Node object?

A.   node.removeProperty("propertyName");
B.   String propertyA = ""; node.setProperty("propertyName", propertyA);
C.   String propertyA = null; node.setProperty("propertyName", propertyA);
D.   node.delete("propertyName");

Answer: C

QUESTION 5
You are creating a repository-based OSGi configuration. Which name should the factory configuration node have?

A. Append "-factory" to the configuration node name.
B. Start the node name with "config-" and end it with "-<numeric_value>".
C. Append "-<identifier>" to the name, where identifier can be any unique name.
D. Start the node name with "factory-".

Answer: C

QUESTION 6
How are the resources called that are passed through a workflow?

A. WorkItem.
B. Transaction.
C. Lifecycle.
D. Payload.

Answer: D

QUESTION 7
You want to prompt a workflow user for information during the processing of a workflow step. Where is the content that the workflow user entered stored?

A. As part of the page.
B. As part of the workflow model.
C. As part of the workflow instance.
D. As part of the design.

Answer: A

QUESTION 8
What is the main purpose of the CQ HTML client library property that is called categories?

A. To easily find client libraries when the user searches categories in the author environment.
B. To uniquely name a group of client libraries to be included in templates or components and to reference dependencies to other client libraries.
C. To link the categories name with the component name, so that the client library can be included automatically into the component.
D. To define the type of files that the client library contains, e.g. JavaScript and/or CSS.

Answer: B

QUESTION 9
What is the purpose of the Impersonators tab within the User settings?

A. Add one or more users that are allowed to take over all permissions from the current user.
B. Add one or more users that are inheriting the permissions from the current user.
C. Add one or more users that can act on the behalf of the current user.
D. Add one or more users that the current user can act on their behalf.

Answer: C

QUESTION 10
Which OSGi configuration settings take over precedence on start-up?

A. Any .config files from <cq-installation-dir>/crx-quickstart/launchpad/config/* on the local file system.
B. Repository nodes with type sling:OsgiConfig under /libs/*/install.
C. Repository nodes with type sling:OsgiConfig under /apps/*/config.
D. Repository nodes with type sling:OsgiConfig under /libs/*/config.

Answer: C

QUESTION 11
Which tab in the Apache Felix Web Console displays the list of all the users that are logged in to the repository?

A. Authenticator tab.
B. CRX Login Tokens tab.
C. Recent Request tab.
D. System Information tab.

Answer: B

QUESTION 12
How do you define the error message that should be displayed when the regex widget validation results in an error?

A. After the regular expression property in the cq:Widget element, add a new property, name it regex and
enter the error message in quotes.
B. Add a property to the cq:Widget element, name it regexText and enter the error message.
C. Create a node under the cq:Widget element, name it options, then create a property called errorMessage and enter the error message.
D. Create a node under the cqWidget element and name it errorMessage. Create a property called text and enter the error message.

Answer: B

QUESTION 13
You have renamed the CQ quickstart file to cq5-author-4502.jar. What is the correct way to install CQ 5.4 as a Windows Service?

A.   In Windows open Services > Administrative Tools and then upload cq5-author-4502.jar to the control panel.
B.   Use the command line and start CQ with java -Xmx512M -jar cq5-author-4502.jar -service.
C.   Unpack cq5-author-4502.jar, navigate to crx-quickstart/opt/helpers and start instsrv.bat.
D.   Open the Apache Felix Web OSGi console, navigate to Services and upload cq5-author-4502.jar.

Answer: C

QUESTION 14
You have a CQ instance configured to use LDAP authentication. In the LDAP configuration file you see the parameter "com.day.core.CRXLoginModule sufficient;". What is the purpose of this parameter?

A.   It means that if CRX can authenticate a user with the CRXLoginModule, the user is authenticated successfully; else CRX uses the next login module.
B.   It means that if authentication fails with the CRXLoginModule, the complete authentication fails.
C.   It means that after logging in successfully, user credentials will be copied automatically to CRX.
D.   It means that the authentication will use a callback implementation.

Answer: A

QUESTION 15
What is the purpose of a Closed User Group?

A.   To define a selected group of authors with special authoring permissions
B.   To define one or more Web pages on the publish instance accessible only by members of the Closed User Group
C.   To define a group of users and assign them admin rights to manage workflows
D.   To define a group of users that have special privileges to do system support

Answer: B

QUESTION 16
You are installing a content package with the Package Manager. What does the setting Save Threshold in the Install Package dialog mean?

A.   The time limit in milliseconds to save a batch of nodes to persistent storage in one transaction.
B.   The approximate number of nodes in a batch that is saved to persistent storage in one

transaction.
C.   The size in kilobytes to save a batch of nodes to persist storage in one transaction.
D.   The maximum size in kilobytes of a temporary snapshot.

Answer: B

QUESTION 17
A change in a JSP is NOT being reflected. How do you enforce a fresh parsing/compilation of the JSP file?

A.   Search and delete the Java Class file from within /var/classes.
B.   Restart the CQ Servlet Engine.
C.   Add a query parameter in the page, which is using the JSP file.
D.   Restart the bundle Apache Sling Scripting JSP Support.

Answer: A

QUESTION 18
Which type of Replication Agent do you create to flush the Web server cache for a newly activated page?

A.   Create a Reverse Replication Agent on the author instance.
B.   Set the Serialization Type property of the Default Agent to Dispatcher Flush.
C.   Create a new replication agent and set Transport URI to point to the Web server.
D.   Create a Dispatcher Flush Agent.

Answer: D

QUESTION 19
You create a Replication Agent on your Author instance. Which transportation user settings should you configure?

A.   User credentials of the same user sending and receiving the replication.
B.   User credentials of a user sending the replication.
C.   User credentials of a user receiving the replication.
D.   User credentials of a user with access rights to the pages being replicated.

Answer: C

QUESTION 20
Which statement correctly describes the OSGi installer service?

A.   It is a provider that searches for nodes of type sling:osgiConfig.
B.   It is a service that scans the CRX repository for artifacts and provides them to the JCR installer.

C. It is a central service for handling installs, updates and uninstall of artifacts.
D. It is a service searching the CRX repository for folders named install.

Answer: C

QUESTION 21
Given the CQ Dispatcher configuration in the /filter section:

/filter
{
/0001 { /glob "*" /type "deny" }
/0002 { /glob "* /content/geometrixx[./]*" /type "allow" } /0003 { /glob "*
/content/geometrixx/company[./]*" /type "deny" } /0004 { /glob "*" /type "allow" }
}

Which rule will be applied to the request: /content/geometrixx/company/news.html?

A. Request denied, because of rule 0001. The first rule that matches the request will be applied.
B. Request served, because of rule 0002. The configuration can only be applied to the second level path.
C. Request denied, because of rule 0003. The configuration with the closest match will be applied.
D. Request accepted, because of rule 0004. The last configuration that matches the request will be applied.

Answer: D

QUESTION 22
Given the configuration in the Apache Web server httpd.conf:

<Directory / >
<IfModule disp_apache2.c>
SetHandler dispatcher-handler
</IfModule>
Options FollowSymLinks AllowOverride None
</Directory>

What is the purpose of the SetHandler option?

A. Enable the CQ Dispatcher only for requests to the / page.
B. URL rewrite configuration directory for the CQ Dispatcher.
C. Enable the CQ Dispatcher for all requests to the server.
D. Define the name of the CQ Dispatcher configuration file.

Answer: C

QUESTION 23
You want to create a custom widget. In which type of folder should you create the custom widget?

A.   Create a folder within the component's folder, then assign nodeType = nt:folder and name it "widgets"
B.   Create a folder of nodeType = nt:unstructured within your project folder and CQ will recognize it automatically
C.   Create a folder under your /etc/design, nodeType = nt:folder and name it "widgets"
D.   Create a folder under your project folder in /apps with the nodeType = cq:ClientLibraryFolder and set property sling:resourceType = widgets/clientlib

Answer: D

QUESTION 24
Which flag should you set when you configure the mod_rewrite rules of the Apache Web server when you are including the CQ Dispatcher module?

A.   'G' flag to force the server to return a 410 Gone status with the response.
B.   `PT' flag to send the original request through to processing pipeline for the Dispatcher to respond.
C.   'R' flag to force all the requests to be redirected to the location specified in the rewrite rule.
D.   'T' flag to set the MIME type for all the HTTP responses.

Answer: B

QUESTION 25
You want the process script to automatically advance the workflow to the next step after execution. Which dialog form field of a Process Step must be set to true?

A.   Process Arguments.
B.   Timeout Handler.
C.   Timeout.
D.   Handler Advance.

Answer: D

QUESTION 26
You want to debug a CQ HTML client library in the author instance. You want to avoid compressing the JavaScript file. What must you do?

A.   Add a property called debugClientLibs to the js.txt and set the value to true.
B.   Add a property called debug the client library root node and set the value to true.
C.   Add a query parameter to the URL called debugClientLibs with the value true.
D.   Specify an attribute called debug in the <cq:includeClientLib> tag and set the value to true.

Answer: C

QUESTION 27
You want to request a JSON representation of the content. What do you have to do with the request?

A. Add the query parameter ?json=true.
B. Change the extension to .json.
C. Add a selector json.
D. Write custom code.

Answer: B

QUESTION 28
What is the purpose of the Export Package Manifest header?

A. Stores the defined packages in the CQ installation folder.
B. Define packages that are copied into a .war file.
C. Stores the defined packages as ZIP file for uploading to CRX.
D. Define packages that can be imported by other bundles.

Answer: D

QUESTION 29
You are creating a component on the page /hotNews.html that needs to list all the titles of the news pages under /news. How does this component get the list of child pages?

A. Use PageManager.getPage("/content/news") of the static PageManager class to instantiate a Page
object and then iterate through the child pages
B. Use the QueryBuilder to look for all children of /news and then iterate through the result set
C. Instantiate a Node object with session.getNode(/content/news) and then iterate through the child nodes
D. Use Sling's resourceResolver to adapt the request resource to a PageManager object, then use the getPage(/content/news) to instantiate a Page object and then iterate through the child pages

Answer: D

QUESTION 30
You want to create a new javax.jcr.Node nodeC as a copy of node

A. nodeC should also be a child of nodeB. What should you do?
B. Node nodeC = nodeB.copy(nodeA.getPath(), nodeA.getName());
C. Node nodeC = nodeA.duplicate(nodeB.getPath());

D. Node nodeC = com.day.cq.commons.jcr.JcrUtil.copy(nodeA, nodeB, nodeA.getName());
E. Node nodeC = javax.jcr.session.copy(nodeA, nodeB, nodeA.getName());

Answer: C

QUESTION 31
You want to view request information sent to the server. Which browser-based tool should you use?

A. Website administration
B. Apache Felix Web console
C. CQ Servlet Engine console
D. JCR Content Explorer

Answer: B

QUESTION 32
You are configuring a Replication Agent. What does the check box Use for reverse replication in the Agent Settings dialog mean?

A. If checked, this agent will notify the user about a successful replication from the author to a publish instance.
B. If checked, this agent will perform a rollback of a failed replication from an author to a publish instance.
C. If checked, this agent will be used to replicate user generated content from the publish to the author instance.
D. If checked, this agent will be used to restore a previous version from another instance.

Answer: C

QUESTION 33
You want to define a Java based CQ workflow process step. Which interface must your class implement?

A. The com.day.cq.workflow.exec.WorkflowProcess interface.
B. The org.osgi.service.event.EventHandler interface.
C. The com.day.cq.workflow.exec.JavaWorkflow interface.
D. The com.day.cq.workflow.exec.WorkflowData interace.

Answer: A

QUESTION 34
You are configuring the dispatcher configuration file dispatcher.any. What does the glob /invalidate {/0001 {/glob "*.html" /type "allow" }} enforce the dispatcher to do when the Web page /content/mypage.html gets activated?

A. The complete cache is invalidated
B. All cached .html files are physically deleted
C. Only the cached .html files are invalidated
D. Delete the cached file /mypage.html and create a new cached /mypage.html file

Answer: C

QUESTION 35
How can you configure a CQ component to allow an Author to edit content without opening a dialog?

A. Create and configure the /cq:editConfig/cq:inplaceEditing node under the component node.
B. Create and configure the /cq:editConfig/cq:inplaceEditing node under the component's design dialog node.
C. Create and configure the /cq:editConfig/cq:dropTargets node under the component node.
D. Create and configure the /cq:editConfig/cq:inplaceEditing node under the component's default script node.

Answer: A

QUESTION 36
You want to extend the foundation Text/Image component by creating a new component. Which is the correct value to add to the property resourceSuperType in the new component?

A. foundation/components/textimage.
B. libs/foundation/components/textimage.
C. components/textimage.
D. /foundation/components/textimage.

Answer: A

QUESTION 37
You have changed the CRX admin password. Which console or tool do you also need to update?

A. CRXDE Lite
B. CQSE Admin Console
C. Apache Felix Web Console
D. CQ User Administration Console

Answer: C

QUESTION 38
You created a site /project/en and want to add language sites /de and /fr. What is the best practice to create the additional language sites?

A.   Use the WCM console to copy and paste from /en.
B.   Use the Language Copy tool.
C.   Create a workflow with a custom process step that creates the according language pages
whenever you create a new /en page.
D.   Create and download a CQ package containing the /en site. Open the zip file and rename the
/en folder
to /fr or /de, then reinstall the package.

Answer: B

QUESTION 39
You have an active bundle which is configured via CRX repository. What do you have to do
after you have saved changes to the configuration to apply them?

A.   Go to the Felix Web OSGi Console, stop and then start the bundle.
B.   Restart the CQ instance.
C.   Go to the Felix Web OSGi Console and re-activate the bundle.
D.   Nothing. Changes are automatically applied.

Answer: D

QUESTION 40
You have a page and want to create a child page. Which property has the highest priority to
determine which templates can be used?

A.   cq:allowedParents
B.   cq:allowedChildren
C.   cq:allowedPaths
D.   cq:allowedTemplates

Answer: D

QUESTION 41
You have successfully installed CRX and crx-launchpad on Websphere Application Server. How
do you install CQ5?

A.   Upload the cq-quickstart.jar file to the Felix Console and start the Jar file.
B.   Start cq-quickstart .jar file within the Application Server.
C.   Upload and install cq.war file to the Application Server.
D.   Install CQ using content packages.

Answer: D

QUESTION 42
How does the Configuration Admin service use Persistence IDs (PID)?

A.   It stores the date for the last configuration.
B.   It stores all the versions of the entire configuration for a service.
C.   It generates a new PID every time the configuration of the services changes.
D.   It associates the service configuration data with PIDs.

Answer: D

QUESTION 43
You want to add additional features to a Node. What should you do?

A.   Add a new jcr:primaryType value to the Node.
B.   Invoke the Node's addMixin() method passing the name of a mixin.
C.   Replace current jcr:primaryType with jcr:mixinType.
D.   Add a new nt:base Node type to the Node.

Answer: B

QUESTION 44
Which is a difference between an OSGI bundle and a Java package?

A.   None. You can install and activate any java package in an OSGI container
B.   A jar file cannot be inside an OSGI Bundle
C.   The bundle contains extra metadata defined in a MANIFEST.MF file
D.   The bundle package structure is completely different than the one of a .jar file

Answer: C

QUESTION 45
You want to install bundles through CRX only in the author instance. Which folder name can you use for that purpose?

A.   All folders under the install folder.
B.   All folders under the install folder that are named author.
C.   All folders named install.author.
D.   The folder runmodes.author.

Answer: C

QUESTION 46
You are logged in as userA and you are impersonating userB. How are your activities logged in the access.log?

A.   The logged userId is "userA"
B.   The logged userId is "userB"
C.   The logged userId is "userA on behalf of userB"
D.   The logged userId is "userB impersonated by userA"

Answer: B

QUESTION 47
You have configured the cached properly in the dispatcher module. What is the difference between:

request 1 = /content/mypage/mypic.small.png?? and request 2 = /content/mypage/mypic.png?size=small

A. NO difference. Request 1 and request 2 both get cached
B. request 1 gets cached, request 2 does not get cached
C. request 2 gets cached, request 1 does not get cached
D. NO difference. Neither request 1 nor request 2 get cached

Answer: B

QUESTION 48
How do you delete a property inside a Node object?

A. node.removeProperty("propertyName");
B. String propertyA = ""; node.setProperty("propertyName", propertyA);
C. String propertyA = null; node.setProperty("propertyName", propertyA);
D. node.delete("propertyName");

Answer: C

QUESTION 49
You have created a bundle with CRXDE. What does the .bnd file contain?

A. The Activator class to notify start and stop events
B. Extra metadata about the bundle used by the CRXDE build process.
C. The list of all classes inside the bundle
D. The compilation and deployment steps of the bundle

Answer: B

QUESTION 50
When you are saving or updating a configuration in the Configurations tab in the Apache Felix Web OSGi Console, where are these configuration settings saved?

A. To the CRX /var/config/ path.
B. Under <cq-installation-dir>/crx-quickstart/launchpad/config/.
C. The new configuration is only kept at runtime.
D. In an internal SQLite DB used by the Apache Felix Web OSGi Console.

Answer: B

QUESTION 51
Which service property does an Event Subscriber need to subscribe to an Event Handler in the OSGi Event Admin service?

A. event.type
B. event.name
C. event.title
D. event.topic

Answer: D

QUESTION 52
Which xtype should you use if you want to reuse a part of a dialog in another dialog?

A. browsedialog.
B. tabpanel.
C. cqinclude.
D. referencesdialog.

Answer: C

QUESTION 53
How can you replicate to a specific agent using the CQ Replicator interface?

A. With the Replicator method replicateToAgent().
B. The object ReplicationOptions contains a method replicateToAgent and you need to pass the ReplicationOptions object as a parameter to the replicate() method of the Replicator class.
C. You need to create a Filter in the ReplicatorOptions object and set the agent that will replicate.
Then you pass the ReplicatorOptions object to the replicate() method of the Replicator class.
D. You cannot replicate to a specific Agent.

Answer: C

QUESTION 54
You want to change the configuration of a bundle during runtime in the repository. Which location has the highest priority?

A. <cq-installation-dir>/crx-quickstart/launchpad/config/* on the local file system
B. /apps/*/config/*
C. /libs/*/config/*
D. /etc/design/config/*

Answer: B

QUESTION 55
In your CQ Component script you want to read a property value which has been created with a design dialog. How can you get the value?

A. String data = properties.get(propertyName,"");
B. String data = currentNode.getStyleProperty(propertyName,"");
C. String data = currentPage.getStyleProperty(propertyName,"");
D. String data = currentStyle.get(propertyName,"");

Answer: D

QUESTION 56
You have created two templates, tempA and tempB. In the property allowedChildren of tempA you include tempB. You create a pageA based on tempA and add a property cq:allowedTemplates with a list of templates, but excluding tempB. Can you select tempB to create a page as child of pageA?

A. Yes, because the allowedChildren property has precedence over cq:allowedTemplates.
B. No, tempB needs to be added to the property cq:allowedTemplates of pageA to accomplish that.
C. No, tempA needs to be added to the property allowedParents of tempB to accomplish that.
D. Yes, because property allowedChildren is checked only if property allowedParents is present.

Answer: B

QUESTION 57
You want to create a page with the CQ PageManager. The parent path does NOT yet exist. Which template is assigned to the parent pages?

A. None. An exception is thrown because the path doesn't exist.
B. The parent pages will be created but no template will be assigned.
C. The parent pages will be created with the same template as defined for the new page.
D. None. Nodes of node type cq:Page are created for the parent path.

Answer: A

QUESTION 58
What is the most significant difference between the Edit and the Design mode?

A. Sidekick is expanded and minimized respectively
B. In Design mode authors can enter content to modify the design of the page
C. Content edited in Edit mode is saved to the current page, content edited in Design mode is saved to the design settings assigned to the current page
D. The Edit mode is mainly used by regular authors while the Design mode is mainly used by super authors

Answer: C

QUESTION 59
You create a custom workflow process using the CQ API. Which method or methods needs to be implemented when your class implements the WorkflowProcess Interface?

A. start(), execute(), end().
B. start(), process(), end().
C. execute().
D. process().

Answer: C

QUESTION 60
You want to configure two hostnames pointing to two different site structures in the same CQ instance. Which configuration must be set in the Apache Web server?

A.   You have to create two dispatcher.any configuration files one for each hostname and include the
two file paths to the httpd.conf file.
B.   You have to create a port forwarding configuration in the httpd.conf file to handle the two hostnames.
C.   You have to create two VirtualHost entries and in each entry specify the rewrite rule to each site
structure for each host.
D.   You have to load the Dispatcher module twice in the httpd.conf and name it with the two hostnames
that you want to use.

Answer: C

QUESTION 61
How do you disable WebDAV access on the publish instance?

A.   Remove the WebDAV bundle from the Apache Felix Web OSGI console
B.   In the CRX User Management Console disable the WebDAV user group
C.   Comment according servlet mappings in web.xml and stop the WebDAV bundle in the
Apache Felix Web OSGi console
D.   Start CQ with java -jar cq-publish-4503.jar -nobrowser -nowebdav

Answer: C

QUESTION 62
What does the Configuration Admin Service in OSGi provide?

A. It provides a set of tools and APIs to create, package and delete OSGi bundles.
B. It provides a GUI tool to edit all the OSGi bundles.
C. It provides tools to manage the access permissions of OSGi bundles.
D. It allows for the management of configuration information.

Answer: D

QUESTION 63
You are creating a component to render a modified image. What is the proper way to build the URL of the image in order to enable caching of the response?

A. /<pathToStoredComponent>.html?run=imageScript&value=parameter1 .
B. /<pathToStoredComponent>.parameter1.imageScript.jpg .
C. /<pathToStoredComponent>.imageScript.html?render=jpg&value=parameter1.
D. /<pathToStoredComponent>.imageScript.jpg?value=parameter1.

Answer: B

QUESTION 64
How do you get the current rendering mode within a CQ component script?

A. slingRequest.getWCMMode();
B. WCMMode.fromRequest(request);
C. JCRUtil.fromRequest(request);
D. componentContext.getWCMMode();

Answer: B

QUESTION 65
You need to restore a version of a node. How do you get the versionManager object?

A. com.day.cq.commons.jcr.JcrUtil.getVersionManager();
B. jcrSession.getWorkspace().getVersionManager();
C. currentPage.getVersionManager();
D. slingRequest.getParameter("versionManager");

Answer: B

QUESTION 66
Which provider service scans the CRX repository for artifacts and provides them to the OSGi installer?

A. Sling JCR Installer.
B. Apache Felix Installer.
C. Launchpad Provider.
D. Sling JCR ClassLoader.

Answer: A

QUESTION 67
You want to override an OSGi component configuration in CRX. What happens if you do NOT specify a property in the CRX configuration that is required by the component?

A. It will use the default configuration for the unspecified property.
B. You will get an exception when the component script tries to access the property.
C. The complete CRX configuration will be ignored and the Felix Console configuration will be used instead.
D. CRX will not let you save the configuration node until you define all the required parameters for that component.

Answer: A

QUESTION 68
You want to create a CQ HTML client library. What is the file js.txt used for?

A. To store all the JavaScript code used in the client library.
B. It will contain the JavaScript usage instructions for the client library.
C. It contains a collection of JavaScript functions used globally within the project.
D. It will contain the paths to all the JavaScript files that will be included in the client library.

Answer: D

QUESTION 69
Which is the correct JSP Tag Library Directive to include the standard CQ Tag Library?

A. <%@taglib prefix="cq" uri="http://www.day.com/taglibs/cq/1.0" %>
B. <%@include file="/libs/foundation/global.jsp" %>
C. <%@taglib prefix="sling" uri="http://sling.apache.org/taglibs/sling/1.0" %>
D. <%@page import ="com.day.cq.wcm.api"%>

Answer: A

QUESTION 70
How do you get the two .jar files jcr-2.0.jar and crx-shared.jar that need to be copied to the Websphere folder holding the shared libraries?

A. Unpack cq.war and copy both files to Websphere's shared libraries folder.
B. Copy crx-<version>-<edition>.jar to Websphere's shared libraries folder.
C. Start CRX Quickstart with java -jar crx-<version>-<edition>.jar -unpack and copy both files from the unpacked folder to Websphere's shared libraries folder.
D. Download both files via CRX Package Manager and copy both files to Websphere's shared libraries folder.

Answer: C

QUESTION 71
You have changed the CRX admin password. Which console or tool do you also need to update?

A. CRXDE Lite
B. CQSE Admin Console
C. Apache Felix Web Console
D. CQ User Administration Console

Answer: C

QUESTION 72
Which statement about the docroot paramter in the cache section of the CQ Dispatcher configuration file is true?

A. It should be the same path where the CQ server is installed.
B. It is required to be the same as the document root of the Web server.
C. It can be any path inside the filesystem that can be modified by the Web server.
D. It should be the same as the one configured in the repository as docroot property.

Answer: C

QUESTION 73
You want to check the response time of a request for a page. Which log file should you choose?

A. <cq-install-dir>/crx- quickstart/logs/server.log.
